

ACE IT (Accelerated Credit Enrolment in Industry Training)

The Accelerated Credit Enrolment in Industry Training (ACE IT) program is the in-class component of a high school apprenticeship. ACE IT programs are usually offered as partnerships between school districts and post-secondary institutions. Students who successfully complete the ACE IT program earn credit towards both high school graduation and a post-secondary credential. ACE IT students are formally registered with the ITA as Youth Apprentices. More information regarding ACE IT can be found at the [Industry Training Authority](http://www.ita.gov.bc.ca) website.
