

TOP 15 THOUGHTS THAT RESONATED WITH EMPLOYEES

School District 82 - Coast Mountains

Q1 The Board of Education for Coast Mountains School District 82 wishes to engage with employees, students, parents and the wider community to understand the potential implications of implementing a vaccine policy. What are your thoughts related to a potential vaccine policy for all staff?

its against human rights we are teaching our youth what is right!

Those who choose to 'vaccinate' do so to be considered safe. Those who wish not to make the choice to be at risk 99.98% recovery rate

Vaccines are still experimental and only allowed because of an emergency use authorization. Forcing this jab could cause unknown illness and death. The safety and wellbeing of our members is too important to be put into the hands of an untested, experimental drug. Our immune system is well tested.

Covid policies have done more to divide society than anything we have ever seen. Stop making things mandatory.

Don't mandate any medical procedures. Bodily autonomy is a basic human right. It sets a dangerous precedent. You cannot take away a person's livelihood just because they refuse to be injected with a drug.

Employment terms and conditions for staff at time of hiring does not include a medical procedure as a condition or term of employment. All policies/employment contracts and conditions/terms must comply with the Freedom of Information , Protection Act, Personal Information Act by Law

I am against mandating a vaccine policy. Covid policies are more divisive than anything in Canadian history. It is time to stop and allow people to choose.

I do not support a vaccine policy. We teach against bullying to our children, yet the school district is bullying staff to be vaccinated.

Most staff are already vaccinated and dedicated to sharing scientific evidence to those in the community and in the classroom. Mandate not necessary there is enough divide in society over vaccines, why bring this into the schools where freedom & anti discrimination are important education concepts?

The people that don't have the vaccine now, wont get it because of a mandate and you will be out that many more teachers and school support staff. The students- and our future no less- will be the ones who suffer from reduced staff numbers. The vaccine is sadly not as effective as hoped.

Vaccines do not prevent the spread. Vaccines may have unknown side effects. Body autonomy is a right. Loss of employment is discriminatory Discrimination or dismissal on the basis of someone choosing body autonomy for whatever reason is wrong.

Whether we agree or not with vaccine mandates, we have to leave room for others to have a contrary opinion. There needs to be respectful discussion. Open dialogue is part of what makes us a democracy. Without it we can become authoritarian and loose our legacy of human rights.
